# Pose avec platine

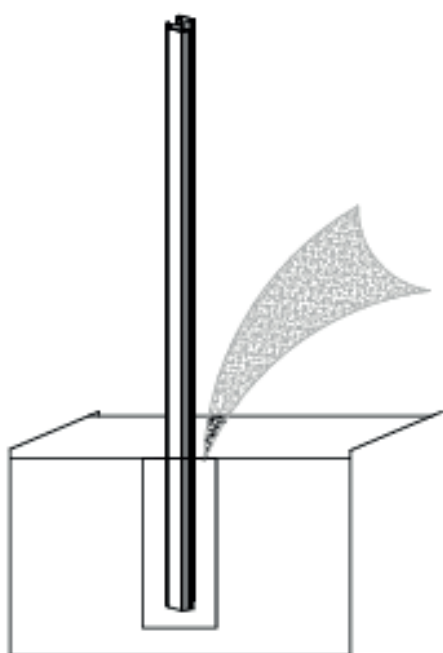

# Pose en scellement

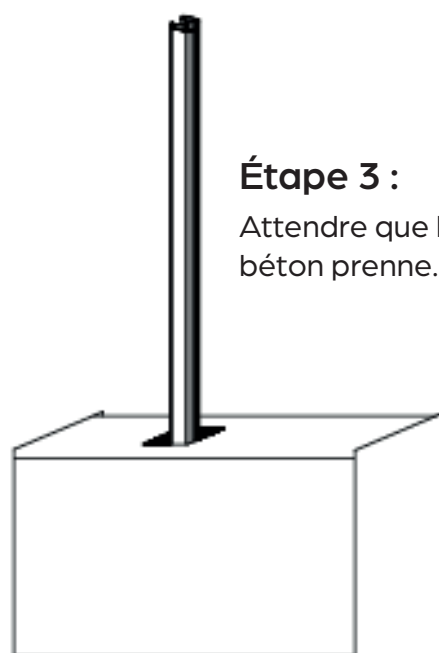

**Étape 1 :** Mesure l'entraxe nécessaire et procéder à la création du trou en fonction du type de support (muret ou plein terre).

## Remarque :

Veuillez retirer tous les profilés en C du poteau avant de sceller les poteaux !

**Étape 2 :** Mettre le poteau de niveau (à l'aide d'un niveau à bull) avant de le sceller.

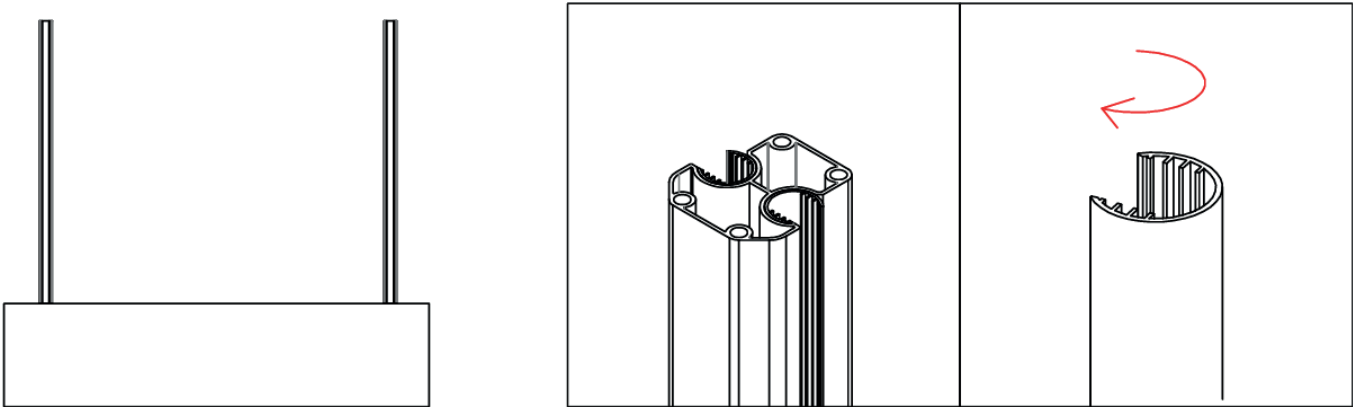

**Étape 3 :**  
Attendre que le béton prenne.

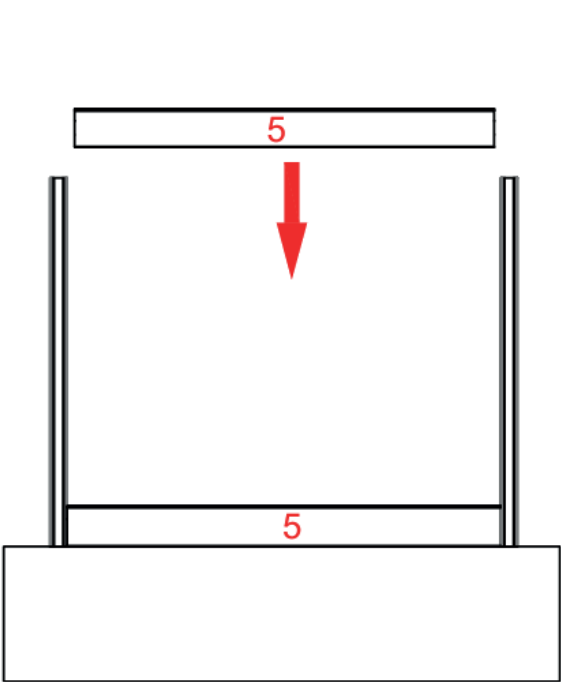

# Lames aluminium pleines
